

# LABELS DE DURABILITÉ PERTINENTS POUR DES ACHETEURS

La liste des normes durables vise à permettre aux acheteurs de s'y retrouver dans les normes durables disponibles sur le marché européen et le marché international. Cette liste sert de support et de source d'inspiration pour les acheteurs qui veulent intégrer la durabilité dans leurs projets d'achat et qui veulent utiliser les normes comme « fil conducteur » ou « matériel probant ». L'analyse est réalisée en se fondant sur les bases de données des normes internationales et européennes (ISO/CEN). On en a sélectionné les normes les plus durables que les acheteurs publics peuvent utiliser. Si vous souhaitez de plus amples informations sur la méthodologie et l'élaboration de l'inventaire, vous pouvez prendre contact avec FIDO ([contact@FIDO.fed.be](mailto:contact@FIDO.fed.be)).

Cet outil offline soutient les acheteurs dans la recherche, la découverte, la consultation et la mise en œuvre de normes durables en vue d'obtenir un impact de durabilité positif dans un projet d'achat. Une fonction de recherche avancée en Excel peut être consultée via ([contact@FIDO.fed.be](mailto:contact@FIDO.fed.be)). La liste comprend des filtres qui permettent d'effectuer des recherches sur la base du « champ », du « groupe de produit », du « groupe de matériaux », de la « dimension », ou sur l'un des autres paramètres.

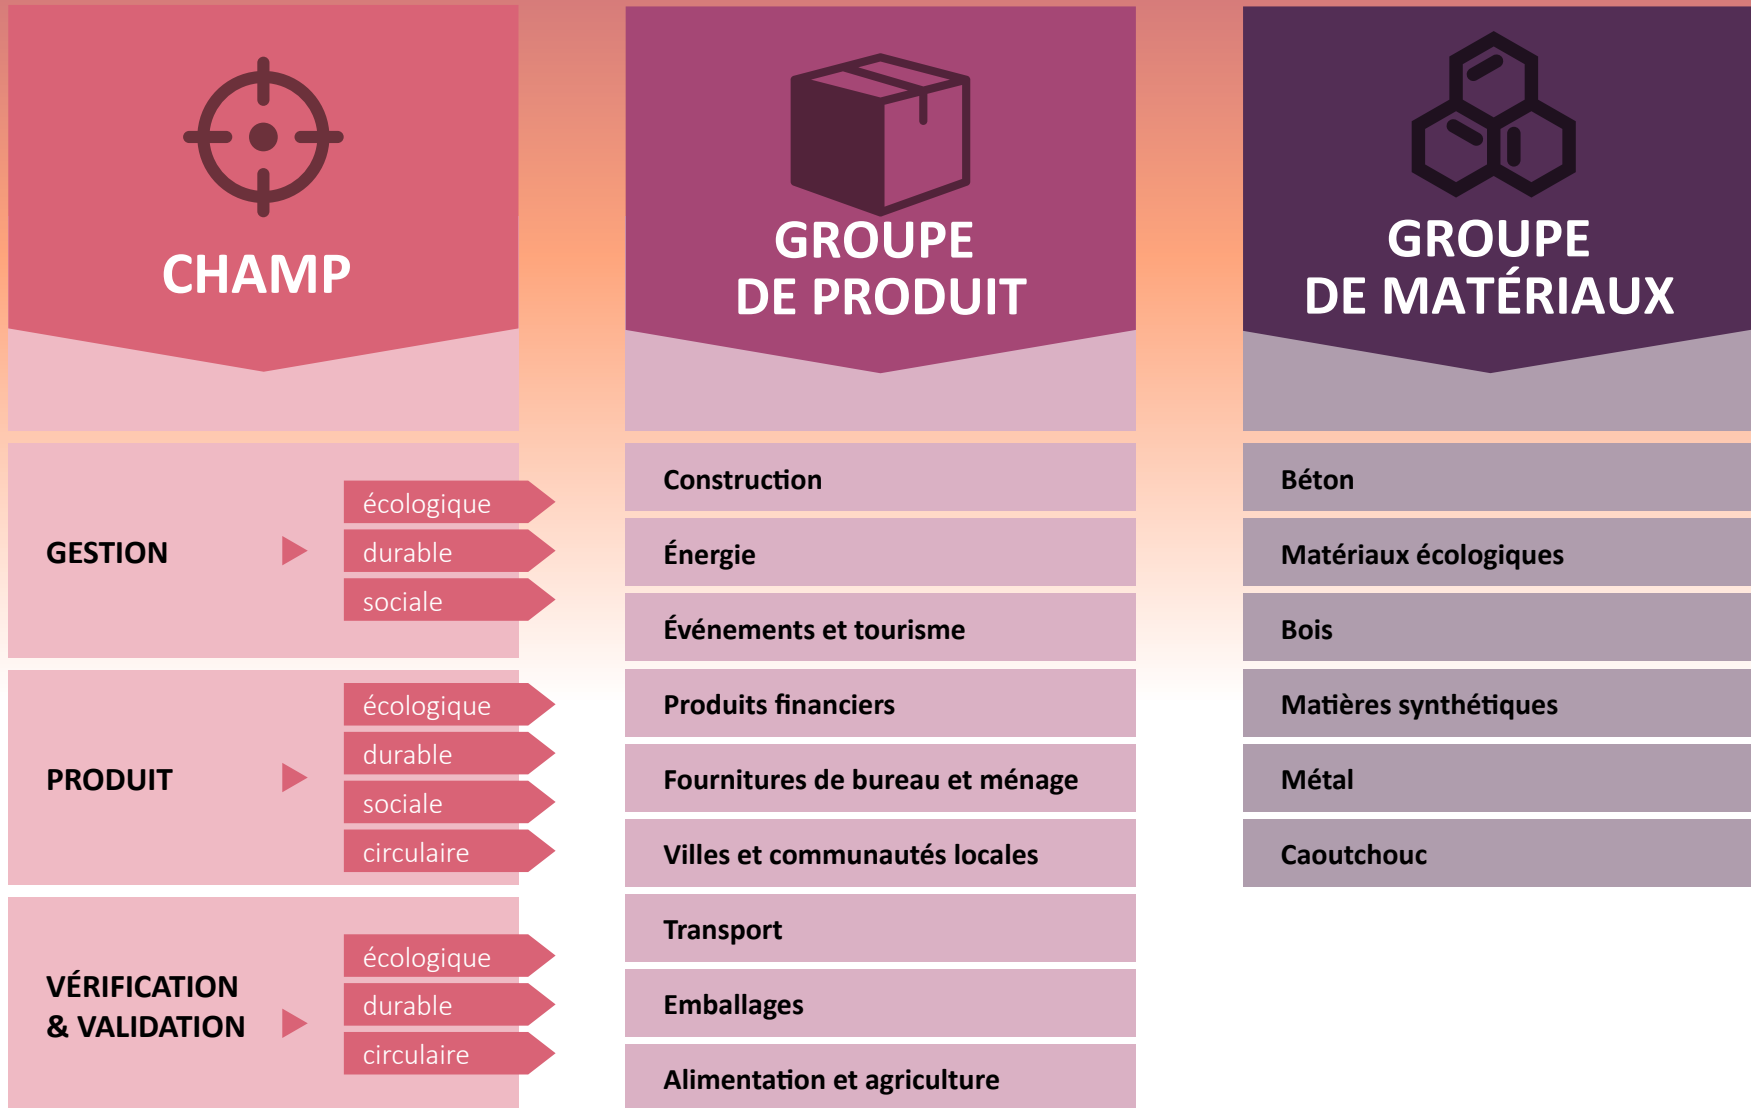

Les normes sont subdivisées à partir de trois perspectives :

- **CHAMP** : « Sur quoi la norme porte-t-elle ? »
  1. **Gestion**: Cette norme décrit un système de gestion, cela signifie la manière dont une organisation gère les éléments mutuellement liés de son fonctionnement en vue d'atteindre ses objectifs.
  2. **Produit**: L'accent de la norme est mis sur un produit spécifique (ou un service spécifique), les spécifications de ce produit, les méthodes de test du produit, les prestations du produit ou toute autre forme de directives pour la production des produits.
  3. **Vérification & validation**: Cette norme porte sur le processus de validation et de vérification de certaines exigences et directives. Cela peut aussi bien s'adresser à l'organisation qu'au produit, ou aux deux (ex. neutralité CO2, analyse du cycle de vie, etc.).
- **GRUPE DE PRODUIT** : « Sur quel groupe de produit la norme porte-t-elle ? »
- **GRUPE DE MATÉRIAUX** : « Sur quel groupe de matériaux la norme porte-t-elle ? »
