4) Technical specifications

Raw materials

- Fiber raw materials (wood) do not come from forestry environments with a large need for protection for biological and/or social reasons.

Chemical products

- Chlorine gas is not used for bleaching.

Evidence:

The compliance with all the criteria mentioned above can be proved with one of the following labels:

Blaue Engel

In case that the tendering company can present one of these labels, any further proof is not necessary. Any other suitable evidence from a recognized body can also be used.

5) Awarding the contract:

	Criterion	Weight
1	Price <i>Calculation (e.g.):</i> Lowest offered price/ stated price x 0,70	e.g. 70%
2	Environmental criteria (The public authority formulates the points it wants to assign to the below mentioned criteria) <i>Calculation (e.g.):</i> Total scored points / maximum number of points x 0,20	e.g. 20%
3	...	e.g. 5 %
4	...	e.g.....

Environmental criteria

Raw materials

- Wood fibers used for the production of filter papers come from forests managed in an ecologically, socially and economically sustainable manner and certified under a generally accepted forest certification system.

If, in special cases, bamboo fibers and/or fibers from other suitable fiber plants, such as for example abaca or sisal, are used these fibers have to come from sustainably managed forests, too. Plantations of such plants must not be, or have been, established on land covered by forests of high conservation value. Here, the relevant year is the year 1994. This can be proofed by the FSC label or any other suitable evidence from a recognized body.

- Only for tea filters: If tea filter papers are made by the use of plastic fibers their share in the fiber material is less than 30 weight percent. The compostability of the filters is not impaired by the use of these fibers.

Chemical substances

- The paper is not bleached.
- The paper is not dyed.
- No glue or other chemicals must be applied to the paper in the process of converting it to coffee filters.

Packaging

- The packaging material consists of at least 80% of recycled fibres.
- The packaging is recyclable.
